| ROSEMARY PERKINS | Richmond,Surrey, United Kingdom | 2014-07-08 | ever since they were small my three children would stop their grumbling in the car, and shout with excitement "the cows, the cows!" as we passed. Now their children do the same. What a pity if they disappear...we love them. |
| Dan Jellinek | Brighton, United Kingdom | 2014-07-08 | Unbelievable! Not only humourless and tight-fisted but these cows are surely great publicity. We want them all back - and maybe an extra golden one? |
| Kelly Falconer | East Twickenham, Hong Kong | 2014-07-08 | Heritage landmark. |
| Tobias Jellinewk | East Twickenham, United Kingdom | 2014-07-08 | Because it has great charm and charm is singularly lacking these days. |

| Stuart Durant | Richmond, United Kingdom | 2014-07-08 | The cows were an important part of the lives of my three children - they adored seeing them and used to shout 'the cows !' whenever they saw them. I'd like my grandchildren to have the same pleasure. |
| Betty Ainslie | Hampton Hill, United Kingdom | 2014-07-08 | It is a landmark and has been a feature of the community for years. I would rather the cows fall on me than the ugly LED advertising signs which are a blight on our landscape |
| Eleanor Pigg | Hampton Hill, United Kingdom | 2014-07-08 | Its been a local landmark and quirky talking point as long as I can remember. Plus, the building needs all the help it can get! The architecture along that road isn't exactly inspiring so something as quirky and random as concrete/fibreglass cows makes people smile, and we need as much of that as we can get these days. Dairy Crest should have more pride in their cows! |

| John Fox | Southampton, United Kingdom | 2014-07-08 | I really miss seeing the cows atop the Dairy Crest, formerly Job's Dairy, building at Feltham. With the high level A316 passing close by at roof level the presence of the cows conveyed a lovely, almost bucolic, 'welcome' to London as motorists transitioned from the end of the M3 and began one's approach to central London via the A316. I would love to see the cows restored to their former position. |
| serena griffiths | Staines, United Kingdom | 2014-07-09 | A lost link with our past |
| Karim Ajid | Richmond, United Kingdom | 2014-07-09 | They've been there all the time I've lived in SW London (18 years) - we remove them now? They served an indicator to my kids that we were almost home. |

| Sandra Whelan | Crondall, United Kingdom | 2014-07-09 | Ever since being a child I have remembered the cows - children's love them and play along to look out and see who spots them first - what harm can they do - they've been there years |

Cows at this location are part of our heritage. Come on Dairy Crest - mooove your minds, it's udderly bonkers to blame health and safety to remove them permanently |

| Matthew Goodall | Spain | 2014-07-10 | Although I now live in Spain, I was brought up in Twickenham. The cows are my welcome home on return trips! Most importantly of all, health and safety and minimal costs should not obstruct the obvious pleasure of countless children. On the cynical side, those same children may remember Dairy Crest when buying dairy products for their own families in years to come. It's a no brainer, Dairy Crest, spend a little, restore a little fun to a grim skyline, look like the good guys and heaps of free marketing! Moo-ve with the times. :) (sorry!) |

My kids used to make up stories about the cows and we always knew we were home when returning from holiday when we passed them by. | Peter Hocken | Ruislip, United Kingdom | 2014-07-10 | Always a landmark on the A316 when I lived in Braknell over thirty years' ago. Only last Easter I pointed them out to my three year old great niece, so was very sad to read of their demise. If nothing else they made a boring building have visual impact. Why does health & safety have to demolish what is fun and what people like. Dairy Crest should grow up and get real. Suggest we all stop buying Dairy Crest products until the cows are restored to their place on the roof. They were there long before Dairy Crest. |
| Will Key | Twickenham, United Kingdom | 2014-07-10 | Bring back COWS ON THE ROOF!!! |

Also when traveling home with my children once we saw the cows we knew we was nearly there. maybe they was in disrepair and so they should be living up there all those years. simple fix their home and put them back out to graze. |
| Russell Martin | Esher, United Kingdom | 2014-07-10 | Kids love it!!! |
| Lauren Shaw | Isleworth, United Kingdom | 2014-07-10 | I've loved the cows since I was a little girl - they always signified that we were nearly home after a long journey! I can't see what health and safety concerns anyone could have about our beloved cows! |

| Jon Cherry | Hampton Hill, United Kingdom | 2014-07-10 | At the end of the M3 the grey, monotonous, urban sprawl of outer London appears in my vision. The cold, architecturally devoid, landscape is broken by the warm glow emanating from a single building. In the distance perched on the roof, reminiscent of a Pink Floyd album cover, five little fibreglass cows keep their heads bowed to reassuringly welcome me back home. It was impossible to drive past without glancing at the herd. Now I glance at an empty concrete field and realise another simple pleasure has gone. |

| Titus Kojder | London, United Kingdom | 2014-07-10 | These kind of silly decisions mean we lose too much character and magic from our landscape, those cows have been a part of my life since 1975 or earlier, if they're getting dangerous then fix them. | Bryony Crowther | Hampshire, United Kingdom | 2014-07-10 | From a personal and emotional point of view, I grew up in West London and, given I am only a couple of years older than the cows, they have been part of my life forever. Following down the generations, my little boy now loves them and was distraught when we drove into London to see my mother and found them gone. From a business point of view, the PR from the small investment of having these cows on another fairly unattractive building in West London has been huge for Dairy Crest. There will be a lot of negative press and knock on brand negativity if the cows are not restored, particularly when the cost is relatively small (cleaning, new fixings and a couple of man hours' worth of time). It would be more cost-effective to put them back, than the cost of the loss of sales, and imagine how many people would be really happy if this was done. |

What is not mentioned here is that the dairy plant itself has been under threat of closure; I hope this is not the beginning of the end. |
| Deanne Archer | Bradford, United Kingdom | 2014-07-10 | I grew up in Twickenham and always knew I was nearly home when I saw the cows on the roof. They are a real historic talking point and should not be totally removed. It would be an extremely sad day if they were. |

| Gary Hughes | Shepperton, United Kingdom | 2014-07-10 | For as long as I remember they have been up there, everyone I know knows about the cows, kids including my own love the cows, we have to make sure we go past the cows on our way home from nanny's just so he can see them. Why can't Dairy Crest just use a tiny bit of their profits to replace them instead of sucking ever bit of character out what is already turning into a mundane bit of England. Or is it the shareholders who just don't care about anything other than lining there fat cat pockets with every penny possible and blaming health and safety. Very poor Dairy Crest very poor. |

They told them they were nearly home as we came back from family in Hampshire and they would count them to check they were all ok. They are iconic and shame on Dairy Crest if they don't restore them to the roof. | Amanda Davies-Day | Shepperton, United Kingdom | 2014-07-11 | They are a local landmark - my kids (9 & 3) love looking out for them. Just because they are humorous in nature does not mean that they are not as important as any other architectural design or object that has a prominent visual position in the area for many years. Just think how many children have had their introduction to sculpture through these cows. Art that brings joy to people's lives is valuable in our society. Please bring the sculptures back. |

| John Pickston | Teddington, United Kingdom | 2014-07-11 | The whole family look out for the cows every time we travel past on the A316 which regularly. Its great marketing for Dairy Crest as it keeps their name in our minds every time we pass. Without the cows we wouldn't notice the building or the brand name. I remember the cows on ground level outside Jobs dairy when I was a kid before the flyover was built and they were moved to the roof. We used to cycle there just to see the cows. | Tina Quenault | Farnham, United Kingdom | 2014-07-11 | As a child these cows were always a family talking point. We used to go to Job's dairy fair every year. I saw this myself as a child when travelling on the bus with my Mum, so funny, we laughed so much. Please keep the cows, they are a landmark and it was really great that Dairy Crest kept them all these years after Job's dairy. They are part of the history of the area and tell such a lovely story. |

| Ron Baxter | Feltham, United Kingdom | 2014-07-11 | I knew someone who worked at the dairy many years ago. He told me that they have been taken down before and sold, but because of being a land mark, new ones were made and put back. I was also told that the ivy growing on the wall is also a land mark and the company were not able to cut it down. Not sure how correct that is. They have been there for as long as I can remember and its nice to see after a long drive down the M3 |

| David Ricketts | Whitton, United Kingdom | 2014-07-11 | Rolling out health & safety concerns is such a weak excuse, it makes me wonder whether this is some kind move by Dairy Crest to generate a bit of free publicity! That said, the cows are clearly something of a local landmark that many residents have grown up with. It would be such a shame if they were removed. It would make the journey along the M3/A316 even more intolerable... |
| Kathy Angel | Bishop Auckland, United Kingdom | 2014-07-11 | I grew up in Whitton after WW11 and remember the concrete cows. I'm 68 this year and would love to think they will still be there for another 60 years. Come on Dairy Crest, do the decent thing! |

| James Marchant | Stroud, United Kingdom | 2014-07-11 | Removing these iconic cows is not only a act of architectural vandalism, it'll take away my smile everytime I pass! Dairy Crest have missed the opportunity for some fun clever PR here! They could have highlighted the disappearance with some clever signage saying the cows have mooved temporarily to summer pastures, whilst they engineered a safe building solution. Then they should have run a competition for the public to find the cows across the country! To just blame H&S is not acceptable! Their marketing and PR teams should know better! |

Perhaps the local community could raise the funds for the cows, or the cost could be raised by auctioning off the current herd. Either way, let's get behind the campaign and pressure the powers that be to moo-ve forward. |

| Clifford Phillips | Woking, United Kingdom | 2014-07-12 | My kids grew up looking at those cows every time we visited family in Whitton, they always looked out for them and got so excited when they saw them, I would like my grandchildren to see them as well. Bring the cows back. |
| Julia Ball | Staines, Saint Barthelemy | 2014-07-12 | Since I was a little girl and my dad use to drive pass the cows he always got us to count them and use to tease us that one was missing. They are part of the A316 and it would be part of the local history you would be removing. I hope in years to come to show them to my grandchildren. |
